Tap&Go Heads

120 FAST

With simplified line insertion.

130 SAFE

The fastest line loading system in its category, featuring a robust spool.

120

The smallest and lightest in the range.

150 PRO

The largest in the series, featuring two cutting levels (mulching effect).

130 LIGHT

The fastest line loading system in its category, with a lightweight spool.

Save time and effort with ACTIVE heads

Tap&Go System:

a feature that allows the line to extend without interrupting work to do it manually. Simply tap the ground with the brushcutter at high speed, and the rotating head will automatically release the line, allowing continuous cutting without pauses.

SIGNIFICANT TIME SAVINGS

Easy line reloading system:

ACTIVE was the first company to design a Tap&Go head with simplified reloading. Unlike traditional heads, where the line must be manually inserted and wound into the spool, ACTIVE's 120 and 150 heads allow for a quicker and more intuitive process.

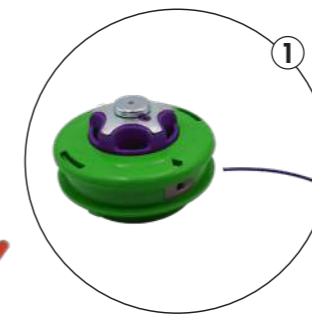

Thanks to a convenient guide tube, the line can be easily inserted into the head and, by simply turning the knob, it winds automatically into the spool.

In the 120 RAPIDO and 130 models, the guide tube is not necessary: just insert the line through the cable eyelets and turn the knob for automatic winding.

INVALUABLE EFFORT SAVINGS

Line reloading system

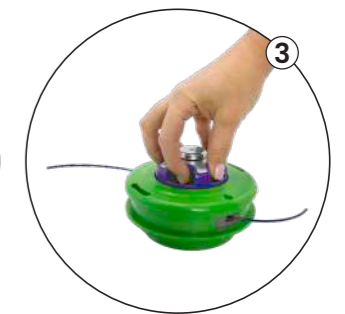

** In models 150 and 120, the line is inserted via the guide tube*

Align the arrow with the eyelet and insert the line*

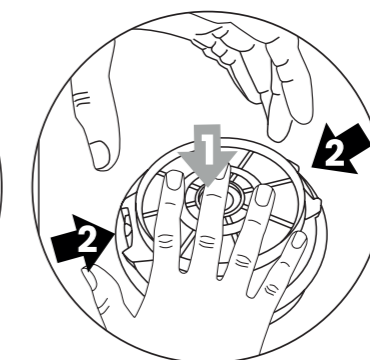

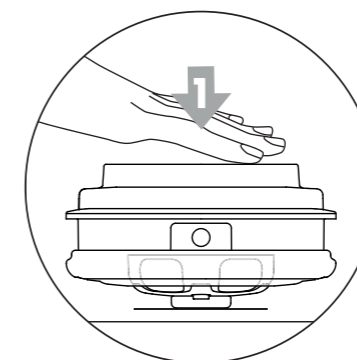

Even the line lengths

Press and rotate the knob to wind the line

Convenient opening system:

The practical head opening system allows the cover to be easily detached from the main body. By simultaneously pressing the knob and the two tabs located on the lower part of the head, the cover can be quickly released, providing easy access for maintenance operations or for

new

130

Ultra-fast line insertion system

Thick cover for greater durability

Bushings securely fixed to the head body

PLATINO®

Registered trademark since 2003

PLATINO®

Durable nylon line resistant up to 180°C

PLATINO®

300°C resistant

Durable nylon line resistant up to 300°C

PLATINO®

ecosilent

Silent nylon line that minimizes consumption

Available in 4 formats

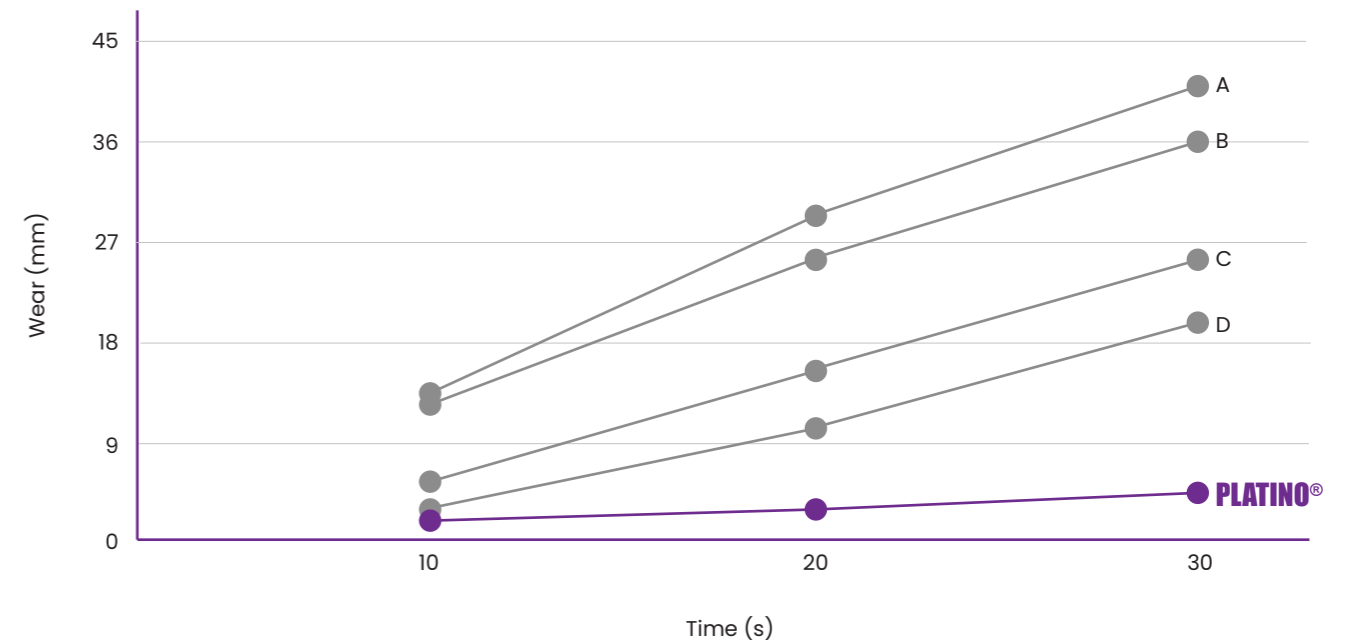

Wear Test

Research Results

The performance of ACTIVE's 3.3 mm PLATINO® nylon line (E) in the wear test was far superior to that of other well-known nylon line brands (A, B, C, D)

Cumulative Wear

10 s interval – 30 mm interference

For 3.3 mm lines, wear was generally lower compared to 2.4 mm lines.

NEW FOR 2026

PLATINO® STAR SECTION

6-ribbed star-shaped line = 6 benefits

- More aggressive cutting:** the star shape has sharp edges that act like blades, cutting grass and small shrubs more cleanly and effectively.
- Better performance on dense vegetation:** ideal for tall grass, tough weeds, or harder vegetation, where a round line may struggle.
- Cleaner cut:** the edges produce a more defined cut, reducing grass shredding and helping to maintain a neater lawn appearance.
- Less overheating:** thanks to its irregular section, the star-shaped line dissipates heat better than the round one, extending its life during heavy use.
- Lower air resistance:** the shape reduces turbulence, decreasing movement resistance.
- Reduced aerodynamic drag = lower fuel consumption**

Lubricants

Mixing Oil

API TC + Jaso FD

Next-generation 2-stroke engine oil developed to meet the needs of unleaded fuels. Thanks to cutting-edge formulations and the use of premium raw materials, ACTIVE oil ensures **long engine life and reliable performance**. Its properties also allow the fuel mix to remain stable for **up to 12 months**.

100% SYNTHETIC

1: 50 (2,0%)

MID-ADDITIVATED

MID ADDITIVATED	023314	022833	023315

The use of **100% synthetic Active oil** is strongly recommended for Strato Charged brushcutters, especially for high-displacement engines and demanding professional applications.

Chain Oil

100% vegetable-based oil for bar/chain lubrication. Produced exclusively from **virgin oils**, this lubricant guarantees complete biodegradability. The additives provide excellent anti-wear properties and maximum adhesion, protecting the oil pump while delivering effective **antioxidant and anti-corrosion performance**.

ACTIVE oil also offers outstanding heat resistance, a high viscosity index, and a low polymerization rate.

Always using original Active lubricants ensures you get the best performance from your product. The engine oils have been tested under various working conditions to guarantee a cleaner and more reliable engine.

Only Active lubricants are optimized for Active products, allowing the engine to perform perfectly for years. The vegetable chain oil is additive-enhanced to prevent thickening at low temperatures and contains no re-refined oils.

		020118	255	25.4	1.4
	4-Tooth	020201	255	25.4	1.4
Shredder blade with 2 curved teeth in special steel, ideal for thinning and removing tough, matted grass and general brush. Not recommended for cutting vegetation with a diameter greater than 1 cm, as the long cutting edge may cause sudden impact and resulting kickback.					
	2 Curved Teeth	020115	300	25.4	3.0
Blade with 8 cutting teeth, suitable for cutting brush or weeds with thick stems (up to 0.5 cm). The small teeth reduce kickback when hitting harder objects. These blades are therefore better suited for cutting on smaller, uneven surfaces or areas with tough grass.					
	8-Tooth	020202	255	25.4	1.4
Suitable for medium- to high-displacement brushcutters, designed for cutting bushes with woody branches, knots, or young trees with a diameter under 1.5 cm. Built to gradually penetrate wood, reducing the risk of dangerous kickback. Ideal for ground-level cutting in undergrowth or natural parks.					
	20-Tooth	020524	250	25.4	2.0
	22-Tooth	020112	200	25.4	1.6

Heavy Duty Series – Made in Germany

Single package

Model	Code	Disc Ø mm	Bore Ø mm	Blade thickness (mm)	
Steel blades with double edge, 2–3 cutting teeth, preferably used on wide areas covered with particularly tough or dry grass. If they encounter hard obstacles, they cause strong kickback to the brushcutter.					
	2-Tooth	027919	255	25.4	1.6
	3-Tooth	027920	300	25.4	3.0
Made of special steel, ideal for thinning and removing tough, matted grass and general brush. Not recommended for cutting vegetation with a diameter greater than 1 cm, as the long cutting edge may cause sudden impact and resulting kickback.
